EDUCATION

Rajeev Institute Of Technology Karnataka, India 2020 - 2024
Bachelor of Engineering - Computer Science and Engineering, CGPA: 7.1
Courses: Object-Oriented Programming, Operating System, Data Structure and Algorithms, Database Management
Skills : Java(SpringBoot), JavaScript(ReactJS), C#(.Net Core), Kotlin(Jetpack Compose,XML), SQL,CSS
Tools : Git, GitHub, Figma
Databases : MySQL , OracleSql
Platforms : Linux, Windows, Android Studio, VS Code, Ubuntu, Google Cloud, Jupyter Notebook

EXPERIENCE

Android Developer Intern Dec 2023 - Feb 2024
Rudraksha Welfare Foundation Hassan, India · Remote

- Implemented Backend Cloud functions with Firebase and created an Astrologer App. Front End Development of the app with MVVM structure and designed from Figma. Added Video Call with one-to-one interaction.
- Implemented UI/UX designs using Figma in collaboration with design teams by converting visual designs into responsive and user-friendly application features

DAYFORCE(Software Developer) Bangalore, India · Onsite Current

PROJECTS

HelpDesk– TicketManagement Application([Code Link](#)) Oct 2023 - Oct 2023

- A comprehensive Ticket Management System built with Java Spring Boot and React to manage tickets, agents, and user roles efficiently. This system includes features for admins to assign tickets to agents, track ticket statuses, and manage tickets across various stages such as new, solved, and deleted. It supports both admin and agent roles
- **Technologies used: ReactJS, Java(SpringBoot), SQL database**

MyPDF - Pdf Management Application ([Code Link](#)) Feb 2024 - Mar 2024 ◦

Developed a PDF management application enabling users to select, upload, view, and download PDF files from internal storage, leveraging Firebase Realtime Database and Storage for seamless data management and retrieval.

- **Technologies used: Kotlin, Firebase, XML, Android Studio**

WordPedia – Dictionary Application ([Code Link](#)) Nov 2023 - Dec 2023

- This dictionary app leverages Dagger Hilt for robust dependency injection and adopts the MVVM architectural pattern to ensure clean separation of concerns
- **Technologies used: Jetpack Compose, Dagger-Hilt, MVVM**

MyWeather – Weather Application ([Code Link](#)) Nov 2023 - Dec 2023

- Crafted a dynamic weather application utilizing the Open Weather API to fetch and display real-time weather data for user entered cities. Implemented immersive animations and background image changes reflecting current weather conditions, enhancing user experience and engagement
- **Technologies used: Kotlin, Firebase, XML, Android Studio, API**
